

# FX BLIZZ

## System Manual

### **Risk warning**

Before you begin trading on Real account please carefully consider your investment goals, risk and experience you have. It should be noted that Forex is a leverage based market. It should be remembered that leverage can work both in your advantage and disadvantage as well. Therefore there is high risk of losing a part or all of your financial input placed on your account and because of that you should remember to trade with the amount of money which you can lose without taking any influential financial damage.

### **Disclaimer**

Signals generated by the system are not investment recommendations. All materials included on the website, as well as all system components (indicators, instruction manual) are for educational purposes only. Creators of the system will not take any responsibility for any profit or loss/damage caused by using the system.

# 1. Installation proces.

- Open your MT4
- Click 'File/Open Data Folder' from the top tab.

- Copy templates files to the 'Templates' folder.

config	15.06.2018 14:09
history	08.05.2018 16:03
logs	16.06.2018 09:40

Scripts	08.05.2018 16:02

- Restart your MT4

- Open your favourite chart. Press the right mouse button and pick FXBLIZZ template.

FXBLIZZ-MODE1– is the standard, balanced template. Moderate risk and moderate signal speed. This mode is ideal for typical daytrading/swingtrading.

FXBLIZZ-MODE2– is more aggressive template. It provides faster signals with increased risk.

This mode is ideal for fast daytrading or scalping.

### **IMPORTANT:**

**AFTER TEMPLATE SELECTION PLEASE SWITCH THE TIMEFRAMES ONCE  
(for example click m5 and m15 TF in your MT4).**

**The software will upload all the necessary data.**

## System overview

System contains three indicators.

1. Background Indicator.
2. Entry/Exit Indicator.
3. Info Dashboard

## HOW DOES IT WORK.

### Entry Examples

System provides very easy to read signals.

BUY SIGNAL: **BLUE ARROW + BLUE BACKGROUND**

SELL SIGNAL: **RED ARROW + RED BACKGROUND**

No trade: **BLUE ARROW** + **RED BACKGROUND**

No trade: **RED ARROW** + **BLUE BACKGROUND**

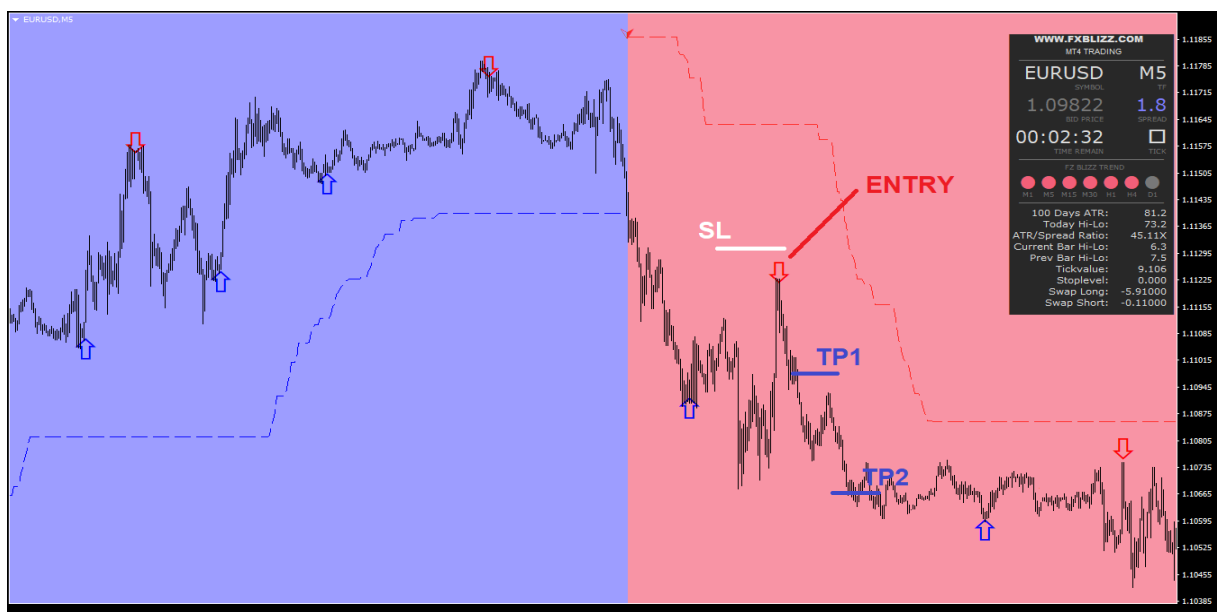

## WHEN CLOSE A TRADE You can use opposite signal.

Or use simple RR ratios. After placing SL below/above the last swing. Aim for the same amount of pips (TP1), or double amount (TP2).

If you SL = 15pips. TP1 should be placed at +15pips, and TP2 at +30pips.

## STOP LOSS

Stop loss order should be placed in the technically best place:

- the last swing high (for the SELL trade)
- last swing low (for the BUY trade)
- at the round number
- close to important support/resistance area.

## BACKTESTING:

We always recommend to forward test the software, as backtest is not always reliable (for example it does not take into account NEWS trading, or 'dead' hours trading). But If you want to make larger backtest some brokers need load up more data. (just scroll back the chart as long as you can, and switch timeframes once. It should load up all the history).

If you need any assistance let us know!
